Project Title – UNIGO

<u>About the project</u> – UNIGO is platform for developing a community of local helpers who are concernedabout the enviroment and take initiative to improve changing climatic conditions.

Features -

The local helpers can:

> Post photos and description of the various initiatives they have taken(like planting trees, posting photos of polluted ponds or factories causing air pollution.)

> For helpful posts they will earn reward points.

Why we're using Block-Chain? -

<u>Transparent</u> – Everyone will be having the same authority/acess to the app.

<u>Decentralized</u> – No organization or person has central control over the plateform.

<u>Immutable</u> – Due to immutable nature of the platform, frauds can be prevented.
